Hi Miranda,

If you could quickly review and address any of my comments quickly, then return what you could address

10/24/2018

by 4:15 today and I will forward it to Amy before I leave the office.

Jayne

Thanks for the feedback Chris!

Since (b) (6) I went ahead and incorporated what I could of Chris's feedback so she can share a rough draft with Tt before she leaves. We can definitely refine it further as we go along.

Jayne – will you share this with Tt? Once they've had a chance to review it, we can set up a call to go over it, get their thoughts, and some estimates of the time and money associated.

Thanks,

Miranda Hodgkiss

Good Morning U2,

Attached are my thoughts. Looks good, very thoughtful. If you want to dive further into the weeds or discuss contractor merits, let's schedule a meeting? Happy to help out in whatever way makes sense. :) Copying Dave as Dan asked me to stay engaged a few months ago (closing the loop de' loop).

Best,

Chris

Subject: Draft TD for Deschutes TMDLs

Hi Chris and Ben,

I've put together this draft technical direction for a contractor to work on the Deschutes TMDL revisions. I've struggled with how much information to put in there. Feel free to let me know if it is too much or too little. And particularly if there is something critical missing for the modeling tasks. I will leave it to the two of you to figure out who can review this, or if you would both like to provide input. Would it be possible to get some feedback a week from today (7/20)?

(b) (5)

(b) (5)

And then last, I also need to talk more about this with Dave, but do you think there is a possibility of getting one of you involved longer-term to be a co-technical lead with me to help out with the model review?

Thanks for your help!
